

Dear FCC, we have been made aware of the above LPFM action being considered by your office. There is a radio station in our area operating on one of these FM translators, on 94.3. This is a national station out of California which broadcasts in our area. We dearly love this station-it is family friendly and is a great enrichment to our community, instead of tearing the fabric of our area apart. If something else were to replace this station, I can't imagine what that would be. This station continually uplifts the lives and spirits of our community and neighborhoods. We believe that if this station is replaced with an LPFM, it would only do harm. We need to keep as many GOOD influences in our society today as we can, as it appears to us that everything is going downhill very rapidly. We don't need any more foul-mouthed DJ's on the air here in our area - we already have plenty! We are respectfully requesting that you do not do this thing. Those of us decent, God-fearing citizens are bombarded enough as it is with detrimental programming both on radio and TV without this one more thing. PLEASE leave 94.3 FM as it is!!! Thank you in advance.
